OlloClip iPhone Lens

The OlloClip is an auxiliary slip on lens system for the iPhone 4 and 4S. To use it your iPhone will have to be removed from its case.

To use this lens system you just slip the OlloClip onto the corner of your iPhone so it covers your phone's camera lens. See photo 1. The fisheye lens is on one side of the OlloClip and the wide-angle and macro lenses are on the other. You just slip it on so the OlloClip lens you want to use is the one that is covering the lens on your phone. To use the macro lens you place the OlloClip so that the wide-angle lens is in position to take pictures and then you unscrew the wide-angle lens to expose the macro lens that is built into the OlloClip housing.

The system comes with a storage case for you to use whenever you remove the system from your phone. The hardest part of using this lens system is removing your iPhone from its case. To see this lens system in action click this YouTube link: http://www.youtube.com/watch?v=74HP-2_nD0&feature=plcp&context=C3f0f20bUDOEgsToPDskLUQxhC8uuRZkiqDjUKyPfD
